APPARATUS FOR ALIGNING PUSH RODS

Abstract of the Disclosure

A cylinder head gasket (211) includes one or more alignment holes (301) and one or more drain-back holes (303) disposed in an area of the cylinder head gasket (211). One or more push rods (211) are extendable through the alignment holes (301). The one or more drain-back holes (303) are formed such that the one or more push rods (211) are incapable of fitting through the one or more drain-back holes (303).
